County of Kaua'i launches online Road Resurfacing and Bridge Status map

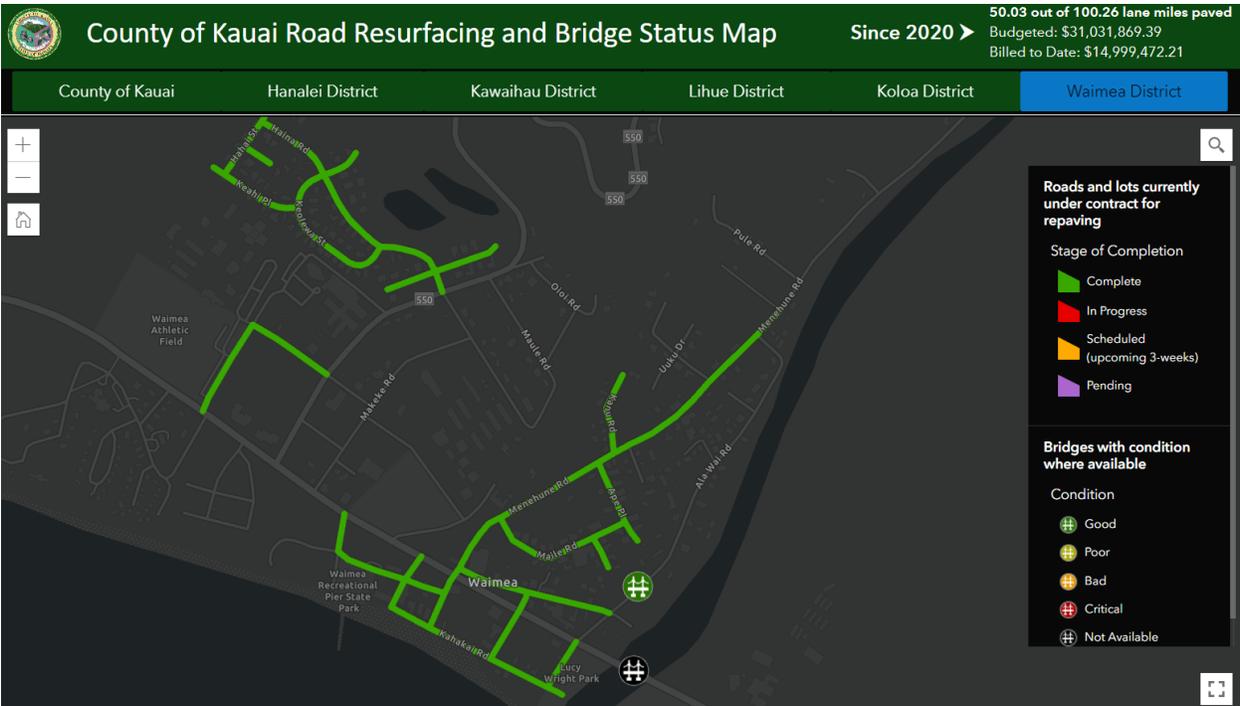

LĪHU'E – The County of Kaua'i has launched its online Road Resurfacing and Bridge Status map. The map is located on the County's website, www.kauai.gov, and clicking on the link, "[Click Here to Access the Map.](#)"

As part of the County of Kaua'i's Land Information Management System (LIMS) project, the Department of Public Works and Information Technology Division created a geographic information system (GIS) that tracks the progress of the Island Wide Road Resurfacing project and status of County bridges.

"Because infrastructure is a top priority for our administration, one of our first integrations into LIMS is showcasing the real-time progress of our road resurfacing and status of bridges," said Mayor Derek S. K. Kawakami. "We hope to integrate more infrastructure and other projects into LIMS to make this information easily accessible to the public."

The online map enables the public to easily track the location of past, current, and upcoming road projects on the County of Kaua'i website. This also tracks how much funds were budgeted for road resurfacing and how much was spent to date. This system helps motorists plan their routes around potential traffic delays.

For more information or questions, please email kauaigis@kauai.gov.

The online map enables the public to easily track the location of past, current, and upcoming road projects on the County of Kaua'i website.
